## Education

|  |                |
|--|----------------|
| <b>Carnegie Mellon University</b>   PITTSBURGH, PA<br>Ph.D. Candidate in Electrical and Computer Engineering<br>Advisors: Prof. Franz Franchetti & Prof. Ken Mai | 2020 - Present |
| <b>Carnegie Mellon University</b>   PITTSBURGH, PA<br>M.S. Electrical and Computer Engineering<br>GPA: 4.00  | 2020 - 2022    |
| <b>Cornell University</b>   ITHACA, NY<br>B.S. Electrical and Computer Engineering<br>GPA: 3.99  | 2016 - 2020    |

## Awards and Honors

|   |               |
|---|---------------|
| Apple PhD Fellowship in Integrated Systems                            | 2023          |
| Carnegie Institute of Technology Dean's Fellow                        | 2020          |
| Cornell Engineering Learning Initiatives Undergraduate Research Grant | 2018 and 2019 |
| Tau Beta Pi Engineering Honor Society                                 | 2018          |
| IEEE-Eta Kappa Nu   | 2018          |

## Research Experience

|  |                   |
|--|-------------------|
| <b>Carnegie Mellon University</b>   PITTSBURGH, PA<br>Graduate Student Researcher, Advisors: Prof. Franz Franchetti and Prof. Ken Mai <ul style="list-style-type: none"><li>Working on a versatile hardware accelerator for FFT based applications; Developing a flexible architecture to support a variety of FFT-based workloads and to enable end-to-end system level integration in an SoC</li><li>Designed microarchitecture and physical implementation of prototype FFT ASIC testchips in a 28nm process; built custom PCB and evaluated testchip</li><li>Looking at applications in large integer multiplication, machine learning, and HPC scientific workloads</li></ul> | Aug '20 - Present |
| <b>VLSI Information Processing Group</b>   CORNELL UNIVERSITY<br>Undergraduate Research Assistant, Advisor: Prof. Christoph Studer <ul style="list-style-type: none"><li>Implemented hardware efficient algorithms for wireless localization using channel state information (CSI) with the approximate nearest neighbor search and Locality-Sensitive Hashing (LSH) methods</li><li>Designed new neural network based methods for unsupervised localization in Hamming space using CSI</li></ul>  | Jun '17 - Aug '20 |

## Professional Experience

|  |                   |
|--|-------------------|
| <b>Apple</b>   AUSTIN, TX<br>Physical Design CAD Intern <ul style="list-style-type: none"><li>Analysis of routines for repeater insertion in the top-level PNR flow</li><li>Explored optimizations to improve the quality and efficiency of buffer insertion</li></ul>   | May '23 - Aug '23 |
| <b>MITRE</b>   BEDFORD, MA<br>Intern in Positioning, Navigation, and Timing <ul style="list-style-type: none"><li>Quantitatively analyzed GNSS navigational measurements and errors to assess potential utility of future GNSS satellite capabilities; Evaluated possible areas of improvement to better performance</li><li>Analyzed GNSS signal processing techniques used for adaptive antenna arrays and GPS signals through modeling and simulation; Performed RF hardware testing to compare simulations with experimental results</li></ul> | May '18 - Aug '19 |

## Publications

---

A. Shah, **L. Tang**, P. H. Chou, Y. Y. Zheng, Z. Ge and B. Raj, "An Approach to Ontological Learning from Weak Labels," IEEE International Conference on Acoustics, Speech and Signal Processing (ICASSP), June 2023

**L. Tang**, S. Chen, K. Harisrikanth, G. Xu, K. Mai and F. Franchetti, "A High Throughput Hardware Accelerator for FFTW Codelets: A First Look," IEEE High Performance Extreme Computing Conference (HPEC), Sept. 2022

**L. Tang**, R. Ghods, C. Studer, "Reducing the Complexity of Fingerprinting-Based Positioning using Locality-Sensitive Hashing," Asilomar Conference on Signals, Systems, and Computers, Nov. 2019

## Presentations/Preprints

---

**L. Tang**, P.H. Chou, Y.Y. Zheng, Z. Ge, A. Shah, B. Raj, "Ontological Learning from Weak Labels", arXiv preprint arXiv:2203.02483

Z. Gong, N. Zhu, M. Ngaw, J. Rivera, **L. Tang**, E. Tang, H. Mankad, F. Franchetti, "Interval Arithmetic-based FFT for Large Integer Multiplication", IEEE High Performance Extreme Computing Conference (HPEC), 2022, Poster with extended abstract

J. Nguyen, M. Cai, Z. Zuo, **L. Tang**, K. Mai, F. Franchetti, "LIMA: Hardware for FFT based Large Integer Multiplication", IEEE High Performance Extreme Computing Conference (HPEC), 2022, Extended abstract

**L. Tang**, R. Ghods, C. Studer, "Fingerprinting-Based Positioning using Locality-Sensitive Hashing," ELI Undergraduate Research Poster Session, Ithaca, NY, May 2019

## Projects

---

**A High Throughput FFT Accelerator for FFTW Codelets** | CARNEGIE MELLON UNIVERSITY Spring '21

- Designed and implemented an 8 point FFT ASIC prototype testchip in a TSMC 28nm process
- Fully unrolled, deeply pipelined design for high throughput running at ~260 MHz clock under nominal conditions
- The first silicon verified testchip co-designed using SPIRAL generated hardware

**VLSI Implementation of 16-bit CORDIC** | CORNELL UNIVERSITY Spring '19

- Full-custom design of schematics and layout to implement a 16-bit pipelined rotation CORDIC using Cadence Virtuoso; Testing and verification performed using MATLAB and Python scripts
- Wrote equivalent RTL models to the custom CORDIC design to compare post-synthesis area and timing metrics to our custom layout

## Teaching Experience

---

**Graduate Teaching Assistant** | CARNEGIE MELLON UNIVERSITY

- 18-725: Advanced Digital Integrated Circuit Design Spring 2023
- 18-622: Digital Integrated Circuit Design Fall 2022

**Undergraduate Teaching Assistant** | CORNELL UNIVERSITY

- ECE 3150: Introduction to Microelectronics Spring 2020
- CS 4780: Machine Learning for Intelligent Systems Fall 2019
- ECE 2300: Digital Logic and Computer Organization Spring 2019

## Selected Coursework

---

Advanced Digital Integrated Circuit Design • Complex Digital ASIC Design • Digital VLSI Design • Reconfigurable Computing • Digital System Testing and Testable Design • Analog Integrated Circuit Design • Computer Architecture • Wireless Communications • Numerical Analysis • Digital Signal and Image Processing • Deep Learning • Machine Learning for Intelligent Systems • Data and Network Science

## Skills

---

**Software:** Python, C, C++, TCL, MATLAB, PyTorch, Keras, Java

**Hardware:** SystemVerilog, Verilog, Cadence
